**Video takes precedent over transcript errors.**

## Chapter 1: Introduction and background

17:35
All right, for everybody listening and waiting for Anna, she should be here momentarily. She was running just a few minutes late, but should be on any second.

## Chapter 2: Commercial status of nations

20:30
Hello,Anna. She does exist.
20:37
Oh, Shannon, you're muted. Can you hear me now?
20:44
Turn on your micro your speakers, Anna.
20:47
I got them. [music] How was Can you hear me?
20:53
Well, yeah, since you turned off the little red light. Okay, here we go. How are you doing?
21:01
Still having a good day. Let's keep that ball rolling. All right. Well, let's make it short and sweet. We're in the clenches, folks. No doubt about it. Um, every kind of verbal deceit and misrepresentation that you can imagine has been leveled at me this week. And I have been able to dance through all the BS like a slalom skier going.
21:34
So, we're in good shape and a lot of other people worldwide are waking up. Even the members of the incorporated [clears throat] governments uh are waking up. And so what you're seeing is a lot of chaos and it's only going to become more chaotic uh once people realize that these are corporations and that they're commercial entities and that they can bring commercial claims against them.
22:11
It becomes a free-for-all. However, the people of each country are the preferential creditors. They are the priority creditors by definition.
22:32
So, for example, the claims of the American people and their states of the union against the foreign subcontractors and all of their proliferation of franchises is first and foremost there's an order to it. So our claims against them go back to the war of independence, what we call the revolutionary war.
23:11
And at that point there was a severance between the responsibilities of the popes and the responsibilities of the British monarchs and the responsibilities of the new fledgling American government. So uh you need to understand that you are in fact by definition the priority and preferential creditors of all these various corporations that have been um masquerading as your government whether that is a uh British

territorial state of state organization or whether it's a um you know a um actual federal corporation or a incorporated supposedly u private vendor that is working a federal contract um like the NSA or the FBI.
24:16
Uh all of these are actually one way or another federal vendors. They're all uh under the same parent corporations.
24:26
Uh there have been very very few American chartered organizations over the past 200 years, 150 years. Um and those that have appeared have been attacked under false pretenses by our own earthw employees.
24:45
So um all of this is going to hit the fan. It has to. Uh, as I have dissected a few things for you this very day, I um issued a an a um court order in my persona as the justice and the fiduciary and um this is going to cause problems for them and it may cause some backlash against me or against individuals. But here's the the upfront of it.
25:23
Um, something had to be done to clarify the situation to make it clear who's who and what's what and who is actually owed and who is the let us say for lack of a better term the priority um creditor. And who is the actual debtor? They have spent a lot of time and a lot of money trying to convince the American people that they owe an insurmountable amount of money and that they are the debtors.
26:11
You are not the debtors. You do owe a debt for enumerated services that were performed under the enumerated powers.
26:28
We do owe a debt to our federal subcontractors for legitimate services. We do not, however, owe an insurmountable debt.
26:47
What they owe to us grossly outstrips anything that we owe to them. The margin is so wide that it is in the neighborhood of 2500 times Okay. So if uh if they if we owe them 40 trillion, they owe us 100,000 trillion. Okay? And that's generous. That is a generous estimate.
27:27
So you are not debtors ultimately when the actual ledgers are brought out and the books are balanced and the um the the sources sof the debt and the amount of the debt on all sides is in front of your face.
27:50
You can see that the American people are owed an insurmountable debt. They are not the debtors. We are owed so much that we could um and will swap what we owe the federal subcontractors without even feeling it.
28:17
We won't even feel $40 trillion of debt because it's not our debt and we can swap it against what they already owe us. So that's what we're doing.

## Chapter 3: Exposing systemic corruption

28:29
There have been a lot of misunderstandings about who's who because of disastrously similar names being applied to more than one organization or more than one function.
28:42
And this is an inheritance that was actually exacerbated in the years following the adoption of the constitutions, the federal constitutions.
28:57
I'm afraid that our erstwhile employees, the foreign subcontractors that received service contracts, constitutional service contracts, um went to great extent and great lengths to obscure and obfiscate and disguise the actual circumstance and the actual identities.

29:27
They also went to great lengths to palm off their debts on us and to allege uh things about us that simply weren't true, to misrepresent us and to misrepresent the circumstance. And now all of that is pulling apart like a spiderweb that had someone put their boot right through the middle of it. And that's why you're seeing the chaos.
29:55
That's why you're seeing um [clears throat] the um you know all these disparate often contradictory announcements about this that or the other thing. This is why you see Trump in his body doubles uh you know all over the planet like cockroaches everywhere um doing different things. you know, you you you can't keep up with all of the um news announcements and and podium events and whatnot. It's just insane.
30:30
So, realize that this is because the federal subcontractors have finally been called on the carpet. This is because the Roman municipal government, the um British territorial government, the um operations of the British crown, the operations of the Roman municipal corporations, all of this has been exposed and nobody knows immediately what to do with it.
31:08
It's a crime so vast, a breach of trust so incredible that they're falling back in front of it. A friend of mine said it's like opening a door and being greeted with a solid wall of cow manure. And you don't know what to do. You don't know how much of it there is. you don't know, you don't know how to react properly to this. Um, and nobody does.
31:43
It takes a little bit of time to assess the situation and determine what kind of a an answer can be brought because they absolutely did all of this damage to all of these countries under all of these criminal pretenses and it cannot be denied.
32:17
What remains is how do we back out of the situation? How do we get things back on track? How do we um resolve the so-called infinity accounts? How do we um re-engineer our answer versus the answer that the military subcontractors um thought that they would provide.
32:53
They um misunderstand partly through ignorance, partly through deceit, partly in self-interest, who they actually work for. And this has resulted in a misrepresentation that you can see by going on Wikipedia and uh looking up some foundational information where they will tell you that um the United States of America incorporated because it's been incorporated since the 1840s. Okay?
33:40
Uh, its supreme law is the Constitution of the United States, which as you all know is the municipal government corporation. So, the Brits are claiming that their civilian authority is vested in the municipal government. In that handful of federal civil servants responsible for administering the post office and those things that were legitimately uh delegated to the Holy Roman Empire.
34:21
And this is not true. This is simply not true. It never was. The delegated authorities did not give away the land jurisdiction to subcontractors, American or otherwise.
34:39
There remain land jurisdiction powers above and beyond any that were ever delegated to the Federal Republic. And in the absence of the Federal Republic, those delegations and powers of authority go back to the delegator, not to other similar but foreign federal subcontractors that are supposed to be operating in different jurisdictions. Okay?
35:10
Now, I did my best today to explain the situation and to bring forward the questions and the identities, and you'll all have to judge how well I did because those notices and those um articles have gone out as international public notices and you will soon have an opportunity to read them.
35:44
And if you come away um being confused, then perhaps I didn't do as well as I should have.

35:53
I may have to give testimony.  I may have to go before international bodies and further explain it and answer questions.
36:07
But the bottom line is that this entire [clears throat] operation has been off course and has been operated under conditions of criminality for over 150 years. And that is not going to be something that can be corrected overnight. That's [clears throat] not something that be can be addressed overnight.
36:37
But what we can do is that we can set up a a system that delivers relief to the victims.
36:47
And we can assert control over the situation instead of standing by and uh trusting any further in the ability and the um willingness of the subcontractors to do the right thing without our assistance.

## Chapter 4: Individual empowerment

37:19
So today we gave them that assistance.
37:24
Uh I hope that everybody here is is kind of maintaining a very positive and independent outlook.
37:36
It's important for you to understand that as few as 7,000 people out of 8 billion can completely change the outcome.
37:53
And you don't have to be anybody big or special. You don't have to be rich.  You don't have to have any offices.  You don't have to be specifically empowered.  You just need to be someone that holds the earth and the people on it in your heart.
38:19
You just have to keep faith with what's good, what's healthy, what's true, and ignore all of the rest of the stuff going on over here. all the lies, all the slander, all the betrayals, all the the selfish, nasty stuff that goes on.
38:42
Keep your focus on positive things. All things that are good, all things that are natural, all things that are righteous. Keep your attention centered on those things.
39:01
And if a group as small as 7,000 people maintains that, then all of this can be set aside, overcome, and a new era of peace and plenty can be established on this planet.
39:29
And the horrors that they had planned for us will be completely set aside.
39:44
I'm hoping that everybody who sees this in coming weeks will take it to heart because it is very important.
39:57
who we are, what we are, how we feel, our thoughts are important.  They're energy.
40:06
And energy is ultimately the true currency of the universe.  So, it's your thoughts and your feelings that make you wealthy.
40:21
It's your thoughts and your feelings that bring justice into the world.
40:28
It's your thoughts and your feelings that dictate your relationship with creation and with the creator.
40:40
I know that many of you have commented on the article I wrote about bringing the Holy Spirit into your life.
40:51

There are some other small but important things that you need to know. Those will be published also. But in the end, at the end of the day, you are all each and every one of you creators.
41:16
You were never intended to be little cogs in a wheel.
41:22
You were never intended to have a hive mind and behave like bees or other creatures that are controlled by instinctive and group think mentalities.
41:39
You are meant to be individual. You have your own unique history as a soul. You have your own unique energy, your own vibration, your own frequency. And never forget that. [clears throat] Never cease to value that.
42:03
Never miss an opportunity to affirm that for yourself and for your children and for everybody else around you. Not only because it's true, but because it determines everything else. Don't be afraid.
42:28
I know that in the days and weeks ahead, you may have valid reasons to feel fearful. You may look ahead and think, "Oh my uh you know what should I be doing? Should I be storing up you know should I be buying large quantities of extra water and extra food or fuel or or whatever?
42:58
The truth of the matter is that if we lose control of the situation, and I mean we the living people lose control of the situation, there will be a crash that will be catastrophic. It will make the crash of 1929 look like a Sunday school play. It will wipe away and destroy the world economy as we have known it.
43:33
And it will throw us back into a situation where large segments of humanity will not survive. That's why it's important that we succeed. That's why it's important that we keep that forward thinking positive focus on what is good and true and right.

## Chapter 5: The power of truth

44:05
The corporations are nothing but paper. They are legal fictions that exist only because we tolerate them. We tolerate them under agreements that were placed into ecumenical and ecclesiastical law two centuries ago. Those agreements have not been honored.
44:40
So what you have remaining are basically if I may describe it this way, two only two bloodlines, only two bloodlines survived. the flood. One of those bloodlines is the bloodline of Cain. The other one of those bloodlines is the bloodline of Seth.
45:34
And you can see that the liars among us have been very very busy. They've lied about everything and anything. They have suppressed the truth. They have misrepresented the truth. They have omitted the truth.
45:57
Any way that they could possibly obscure the truth, they've done so. That's to be expected.
46:13
We on the other hand have not been as diligent in discerning the truth, upholding the truth, asserting the truth, bringing forward the truth, and ultimately letting the truth prevail.
46:35
So all along I've been telling all of you the importance of the truth and the importance of your devotion to the truth. It begins with small things. Making up your mind that you're not going to tell lies of any kind about anything ever.
46:58
Once you take that plunge and you say, "No, no more no more dog ate the homework excuses. No more avoiding how I really feel about that person. No more excuses to tell yourself lies, to accept lies, to avoid

confronting lies." Okay? Once you devote yourself to the truth, a series of miracles will happen in your life.
47:34
One of which is that you will suddenly see all of the lies and you will be able to destroy them with pinpoint accuracy. It won't take you more than 3 seconds. You will know. And that is a wonderful ability.
47:57
It's one that you have inherited by nature in the same way that the bloodline of Cain has inherited its ability to turn everything and anything into a lie.
48:18
So the good news is that there are many many many many more of us than there are of them. The other good news is that lies are by their nature very weak and they crumble easily once they are subjected to the truth.
48:40
So your ability and strength is as truth tellers. Your great gift is the ability to discern the truth. And the only courage that it takes is to bring forward the truth and let the truth do the fighting for you. You don't have to fight this. You do not have to take up arms. You simply need to know who you are, know the truth, and stand by it.
49:29
We are now at that point where the Bible tells us that the creator himself will fight for us. That the creator himself will prepare a table in the presence of our enemies. That the creator himself will renew the earth and destroy the world as we've known it. Believe that it's happening right now. It's happening right in front of your faces.

## Chapter 6: Practical guidance for listeners

50:25
So, cuddle down. do what you can to prepare for possible upsets, possible breaks in in um supply chains, um possible um interruptions of electrical service, uh shortages of various kinds. Um, be prepared for uh riots in the in the larger cities. Uh, be prepared for all sorts of possible misinformation uh coming from numerous different news sources.
51:11
Um, you know, use your discernment, use your observational skills. Um, treasure the time that you have with your friends and your family and keep your mind and your heart centered on what is good.
51:38
And people come to me and they say, "What can we do? What can we do?" Well, frankly, there isn't a whole lot that mom and pop and Joe Average can do. You can write letters. You can inform your local people, your uh you know the members of of the city council or assembly or whatever they're calling themselves.
52:05
Uh you can bring forward the information to any members of of your family that are in the armed services that you can reach. Uh you can um you know grab the members of the foreign congressional delegations by the ear and say look. But let's face it, this is a gigantic swarming planet right and everybody, everybody has their own viewpoint and all of those individual hearts and minds are struggling right now to conceive of a fraud scheme of this magnitude.
53:08
So, it's important that you remain steady and you stand as an anchor in the middle of this whelming flood of confusion and dissonance and and craziness. Okay?
53:29
You need to stand firm. You need to anchor down. You need to be the the silence, the the still point, the grounded energy, that brings order to the situation around you.
53:54
That's your calling. That's what every earth angel is here to do. And it's what everyone needs to do to the extent that they can is just to turtle down, say no to all of the swirling BS, and hold tight.

54:19
By doing that, you assist everyone who is on the front line doing this work.
54:31
And you are also helping your families and your communities because there are a lot of people who have no idea what to think, who to believe, or what to expect.
54:55
That's where you come in. That's where you raise your hand. That's where you reach out a helping hand.
55:11
And by the way, everything that we have said has gained a great deal more credibility over the last two weeks. So, you are no longer in the gross minority and you're no longer in the tin hat category, with a ever growing percentage of the population.
55:36
I hope that's some comfort and I hope that it leads to um a reconciliation with members of your family who may have rejected you and may have um you know held you up uh to scorn or rejection because you saw the truth and came forward.
56:03
I know many families have been harmed by differences in perspective about all of this. So hopefully uh for some of you this means that sons and daughters that drifted away and said I don't want to hear about all that will come back and appreciate your wisdom and your courage.
56:36
I certainly appreciate your wisdom, your courage, and your self-sacrifice, your volunteerism, your willingness to help support the effort to bring forward the truth and get the world back into a state of renewal and transformation instead of a condition of continued corruption. and dissolution.
57:08
So, questions. I'm here to answer questions.

## Chapter 7: Addressing financial systems

57:19
Shannon.
57:22
All right, we've got questions. Lots of them. [clears throat] [snorts] All right. Reading the news report this AM regarding Mr. Trump's two executive orders executed yesterday. One burries the IRS. The other regards the Federal Reserve that opens the network for non-bank entities. More specifically, one varies the IRS for good. The Department of Justice language reads like this. Permanently prohibited from conducting investigations or prosecutions and hereby excluded. It sounds to me like a death certificate for the old regime's tax collection arm.
57:55
The other opens up the Federal Reserve's FRB statement settlement network to electronic assets and non-bank entities without banking licenses. It sounds like he just opened the door to systems that don't need banks.
58:08
Question one is repurposing the same for our use of the IRS or MC execution under the Secretary of Treasury and the Secretary of State to lawfully discharge alleged debts. Is that what is going on? The second question is, could this be more open door allowing for our bank system alternative to their alleged up coming QFS reset, thus negating your monopoly claim regarding the QFS system?
58:43
I wish I had an answer to that at this moment. It's one of the things I've been chasing for the last two months. Um, the remaining clouds over the QFS system are issues of identification and who owns the identification. If we can resolve that, then there's no reason why we can't use the QFS.
59:12
Um, there has to be some sort of a um a code. Maybe something as simple as adding a an A to every American account and a B to every British account. Uh, but otherwise it's pretty simple.

59:37
And you know, I'm not a big fan of the QFS.
59:42
Uh I don't think it's nearly what it's uh cracked up to be in terms of security or utility. I actually think that we have built a better system for our prosperity centers for the distribution of credit than they have built uh as a distribution of debt.
1:00:05
Uh I think that the use of debt notes uh as a uh a means of purchasing um material I think that whole system ultimately has to go whether it's a a matter of you know prloining commodities or services it's still prloining and it's still illogical uh to use debt notes when we could instead use credit.
1:00:52
So anyway, uh we have prepaid credit in such gross amounts that it doesn't make sense to use debt notes anymore. And it doesn't make sense to run the world on debt anymore.
1:01:08
Um, you know, you you have to understand that the world is that construct that men have made.
1:01:20
The earth is the construct that the creator made. Okay? So, two different things. But the world has been run in such a deceptive, criminal, lopsided way that it cannot endure in its present form.
1:01:44
So it has to be completely transformed. It has to be alchemized. It has to be fundamentally changed. And the QFS system as it stands, as it was designed, does not do that. It continues a form, an even more coercive form of the same old evil. And it also continues to make ownership claims against the users of that system.
1:02:18
So that's another reason the fundamental reason uh that we object to the QFS system and um also it's another reason why we uh object to the Fed now system because it's continuing to kick the can down the road and build up more prepaid credit on the backs of the living people instead of discharging the debts, the public debts. Um they're continuing the process of collecting and increasing public debt and charging ursery on it, which makes no sense whatsoever.
1:03:01
And the only other thing that they can do is if they continue this system, they um they wind up with hyperinflation or destruction of the currency. And by destruction of the currency, I mean um they wind up with a situation where they have to destroy the Federal Reserve note entirely and try to replace it with a something like another kind of note, a US note, uh and and try to to play that as a new currency because the old currency is going to hyperinflate out of existence.
1:03:42
So there are limited answers to this whole mess and I remain convinced that the best answer is that the governments for swear absolutely for swear making any claims of ownership against any living individual being and against the the assets ass and the rights and properties that belong to that individual living being.
1:04:22
And until I can secure that and be sure that none of these um payment programs come with ownership claims against, for example, the DNA of people, then those are not acceptable answers.
1:04:49
So much of of the crime [clears throat] against humanity that this represents is based on a continence of peonage and enslavement in the jurisdiction of the sea and the jurisdiction of the air, when in fact there should be no pinage or enslavement anywhere. Because remember it was completely agreed upon in 1926 that peonage and slavery were abolished on a planetary scale under the nations and leadership of the land jurisdiction governments that were members of the League of Nations.
1:05:41
So what we have here are continued illegal, unlawful, immoral claims of ownership interest by government service organizations against the people. And that is what is the stickler of the QFS system.

1:06:11
They want to own your DNA. They want to own your identity. They want to have an ownership interest in you instead of you having an ownership interest in them, which is the actual factual, natural, and inescapable, logical um reality that needs to be asserted.

## Chapter 8: Analysis of the IRS

1:06:41
Okay. So, Mr. Trump's executive orders are issued as commanderin-chief, a naval office on the land where it shouldn't be. , they're issued as if they apply to everybody, but they actually apply only to British territorial US Citizens with a capital C.
1:07:07
And as a result, um, what when he comes through and and destroys the IRS, for example, they should have been destroyed a 100red years ago. They should never have gotten started. And that is just obvious to anybody who spends any amount of time really looking at what went on just prior and just after who looks at the Federal Reserve and how it was created.
1:07:38
Um all these different things just scream that you know this was an attempt by the British territorial government, the corporation doing business as the United States of America incorporated to open up tax collection in the States of the Union.
1:08:00
And the way that they did this was by pretending that they were only going to go after their own tax cheats. For example, people from Puerto Rico who moved to New York and who as Puerto Ricans and members of a British Commonwealth nation continued to owe taxes to the British territorial government. Okay, so this was their excuse. uh they were not allowed to come into the states of the union and collect 3 taxes in the states of the union because we were afraid of exactly what's happened that there would be attempts to redefine Americans as British subjects and tax them as British subjects that there would be attempts to redefine Americans as Roman municipal citizens and tax them as Roman municipal citizens. And that is exactly what's happened.
1:09:01
This is the quote unquote mischief that Justice Harland foresaw in Hoover versus Hooven versus um Evatt and and all of the other insular tariff cases because they were collecting an insular tariff tax in the States of the Union.
1:09:28
And the pretense was that they were just collecting from their own citizenry, their own employees and their dependence. And they worked it around so that they misidentified all their American neighbors and employees and our neighbors and employers as British citizens and collected British taxes.
1:09:55
And they misidentified and misregistered all those British subjects as additionally Roman municipal subjects and collected taxes from them.
1:10:11
So the IRS never had any business being in the states of the union, not in the shape of the Internal Revenue Service Incorporated, upper and lower case that was, you know, incorporated in the state of Delaware in 1925 and not as the IRS, the Roman Municipal Organization, which has and reorganized and registered in all of the British Commonwealth uh territories.
1:10:46
For example, the one that was going after us was registered in Puerto Rico and the one that they had planned to go after China was in the Leonesron, the Marana Islands.
1:11:01
This is a a setup they set up on Norfolk Island so that they would have a base of operations that they used to set up all these um foreign trusts and tax the Australians.
1:11:18

You know, you can go all the way around the world and you see the same pattern. You see the same scheme, the same shtick, this the same fraud that that they've practiced all along in Britain, meaning England, Ireland, Scotland, and Wales, and in America, meaning all our states of the union.
1:11:44
They have just been fraud artists. And as I've pointed out many times, whether or not you're a federal employee, payroll kickback taxes are still illegal in this country on our land and our soil.
1:12:02
So no matter how you look at it, the quote unquote federal income tax, even against federal employees, was illegal and unlawful and immoral. And that question had already been settled under the constitutional contracts. They just used their own Supreme Court to weasle around it and allow themselves to come onto our land mass and collect taxes from their own citizenry.
1:12:45
And then it was just a matter of conveniently misidentifying everyone as part of their citizenry. You know the rest of the story. So I'm glad that Mr. Trump finally did away with the IRS for uh the British territorial British subjects. They should never have had to deal with the IRS at all. They shouldn't have been present in these states of the union. they shouldn't have been collecting from the payroll of anybody.
1:13:16
Now, the um the [clears throat] rest of the the story has to be the destruction of the IRS, just the capital letters IRS, which is the municipal end of the shtick. And I believe that that will happen simply because the municipal government once made aware of its mistakes and failings has been willing to correct.
1:13:44
And the same applies to the municipal citizens of the United States. payroll taxes, payroll kickback taxes essentially because they're paying these people and then they're collecting back, you know, up to, you know, half of their earnings directly a labor tax which is peonage and it's grossly illegal and always has been since 1926.
1:14:14
Okay. So, I expect the IRS to fold up and disappear, but I expect that the IRS, as opposed to the Internal Revenue Service, will go without a public um order. And the reason I say this is that it has been the long-term policy of the um Roman Curia that when it makes a mistake, it just corrects it silently. There's never any public admission. They simply disappear. The problem disappears. And so, expect the IRS to just vanish.
1:14:59
You know, one day you stop getting letters from the IRS. One day you no longer hear about the IRS. You no longer see the IRS on on buildings. you no longer see the IRS in the newspaper. Okay, it just it goes. It's vanished. It it it never happened. That's how the the um Roman curia tries to deal with things.
1:15:28
Um the British territorial government being military subcontractors in this country, they have a much more regimented um protocol that they have to follow. And so the commander and chief wrote an executive order and did away with the IRS, the Internal Revenue Service, that they were using to presumably collect from their own citizenry.
1:16:08
And that's right. That's righteous. It's long overdue. It should never have happened.
1:16:20
Anyway, I don't know how that is going to play out. I don't know how many people are going to wake up and go, "Oh, holy shit. Think of all of the money I paid out to the IRS that wasn't even, you know, was no debt of mine. I wasn't federale. I didn't work for the federal government. What the hell?" and, you know, goes out and and starts a um, you know, a court action against the IRS that's gone, right?
1:16:52
Well, um, yeah, this this is just part of the debt, the prepaid credit that is owed to the living people. And it's owed to a greater or lesser extent to all the living people because remember what I told you payroll kickback taxes are illegal too.

1:17:23
So whether you are an an actual federal employee or a federal dependent or not, it was still illegal. It was still unlawful. It was still immoral as hell. And so whether you're an American who absolutely never ever could even be accused of owing federal income taxes or you were a federal employee or dependent who could be in theory liable for federal income taxes.

## Chapter 9: Unlawful taxation systems

1:17:57
The imposition of a kickback tax, a payroll kickback tax on our land and soil was never legal, was never lawful. And you'll notice that Title 26 was never enacted into positive law. It has no enabling clause. It was never published in the congressional record. It has nothing to do with us.
1:18:25
It was imposed upon us under color of law and duress, plain and simple. And they even had to use an impersonation scheme to get away with it. They knew they couldn't impose it on Americans, so they used the baby registration as a way of claiming that we were British subjects instead.
1:18:59
And once they had claimed that we were British subjects, they used that British subject to create a Roman municipal corporation, an estate trust for the British territorial subject.
1:19:18
None of this had a damn thing to do with us Americans just living in our own peaceful country. And it didn't have anything to do with the Germans or the French or the Irish or the Danes. It had nothing to do with the Spanish. It had nothing to do with the Ukrainians. It had nothing to do with anything except corporate greed.
1:19:49
So I'm glad to see that Mr. Trump woke up and got rid of the Internal Revenue Service, upper lowercase. And I certainly expect that the Roman Curia now that they have been identified and are in everybody's sites will realize that it's time to get rid of the IRS too and shut down their operations in Ogden, Utah.
1:20:17
They don't need to have a postal address on our land and soil anywhere. They have no contractual consent to have a postal address anywhere on our land and soil. And they cannot just go around and give themselves rights and opportunities to trespass on their employers.
1:20:46
So anyway, that whole thing should never have happened. And it's taken three to four trillion dollars out of our economy every damned year since Ronald Reagan. Think about that. Where has all that money gone? Who was siphoning off the public te? And who was causing all of this disruption, misery, fear? Uh, you know, anyone older than 15 has dreaded April 15th for their adult life. And it was all bogus. It was all just criminality. It was all corruption. It was all fraud.
1:21:36
And now when you think about that, think about the billions with a B that we have spent on every kind of security and law enforcement and um you know investigatory agency that you can think of. Dozens of them. everything from the NSA to the FBI to the CIA to all of these different, you know, law enforcement, National Guard, uh, you know, military, all these different organizations that were supposed to be keeping us safe from all enemies, foreign and domestic. And instead they were sitting here letting the IRS collect from themselves and collect from us under completely bogus excuses.
1:22:43
In other words, it's not just a matter of the IRS or the Internal Revenue Service being here doing something that they should never have been allowed to do. It's a matter of all these organizations that are supposed to be protecting us and and providing security for us and our assets being worthless being absolutely 100% worthless.
1:23:12
So why are we paying them? Why are we paying police that don't protect us but instead come around and harass us? That is the that's why there's this kickback against not paying the police. It's not that people

disrespect law. It's not that people are anti- police or anti- um peacekeeping or anti, you know, it's that what we've had here has been so corrupted and so useless that, you know, the the natural inclination is to say, "Fire the bastards. They're not doing their job.
1:24:03
And for the police, most of them are so ignorant and so dependent on bar attorneys that they don't know. They're like the prison guards at Oshwitz saying, "Well, I was told to stand here and do this." Okay? And that's the situation that we've got thanks to Pepe Orsini. And let's just lay it on him. He knows better, but he's just off on his little rampage and thinks that this is acceptable. It's not.
1:24:41
They weren't hired to protect corporations. They were hired to protect people. And that's where they've got it exactly backward.
1:24:51
In any event, um it should disturb you that Donald Trump acting as the executive officer of a British corporation has to use an executive order to get rid of something that should never have existed and if it existed should never have been anywhere near the States of the Union.
1:25:20
You're going to see a lot of shakeups. You're going to see a lot of things that that just make your head spin. And in the middle of it, you're going to realize just how much you've lost, how much energy, how much joy, how much freedom, how much money, how much property, how you know that you've lost directly. you and your family have lost over the last 50 years because of this swarm of uncontrolled criminality just unfolding in front of us and nobody speaking up about it and nobody doing anything about it.
1:26:03
To the extent that you're seeing this happen now, it's because people woke up. It's because people started really digging into things and going, "Hey, Joe, look at this." [clears throat] Just like we've done.

## Chapter 10: Legal status and wills

1:26:23
So, you know, if I were you, I would count the IRS as down and out and not coming back because it should never have been here in [clears throat] the first place. Um, the other reason that I think you should count it as down and out is that the premises on which it operated are proven false.
1:26:47
I just want to take a little moment here and talk about Mick Vexler and his exposure of the property tax scheme. Realize that all these foreign taxes came ashore and into our states of the union because of what?
1:27:15
The 16th bylaw amendment to the corporate constitution of the United States of America incorporated, that is not subject to ratification by the states and it was never ratified by the states. The 16th amendment was never even written into positive law. It has no enabling clause or act zip. It was never read into the congressional record. And as far as I can find thus far in a superficial trot over it, there is no indication that it was ever made part of the Federal Register beyond a date.
1:28:25
So all taxes, not just federal income taxes, but property taxes misapplied to Americans and American land holdings were authorized under the 16th amendment, to that corporation's constitution and never ratified.
1:29:07
So, none of those taxes should have been here either. All of this mischief started with the insular tariff cases that took place between about 1900 and 1904, which argued whether or not these foreign subcontractors could come into the states of the union and collect taxes that were owed by their own citizenry.
1:29:42
And then they just misapplied it to Americans. Ad infinitum.
1:29:50

So now you got a view of that. Property taxes never applied to Americans either. They should never have even issued land descriptions or titles.
1:30:14
Every time you see that word title, it should just ring a bell in your head and you should go titles. British titles British titles British. Who has titles? The freaking British. Lord this and lady that. Earl this and Earl that. Baron this and Baron that. Count this and count that. Those are titles. Mister is a title. Ms. is a title.
1:31:01
So, do you want an allodial title? Do you need an allodial title? No. No, you don't need a land title and you certainly don't need a municipal lot and block description and you do not need any any paperwork from any burrow uh related to such a description because as I have explained before this is nothing but a deception.
1:31:36
This is a case of your employees trying to pawn off a photo of a cat as if it's a real cat. And you need to be aware and you need to defend your interests against all of this because if they get away with it, it just gets worse and worse and worse.
1:32:00
Pretty soon, you're outright enslaved and redefined as a transhuman because they managed to get a harmful piece of genetic engineering into your veins.
1:32:13
You have got to take action. You have got to stop them. You have got to put them in their place and you have to get to the banks and make sure that the banks are not issuing money to these vermin. Because without the bank's complicity, none of this would be happening either.
1:32:38
So that's why I am working so hard to come up with a bank system that will work that does not make any claims of ownership against the users of that bank system and that is a an honest transparent reliable means of people exchanging goods and services. That's all it needs to be. It is not rocket science.
1:33:05
It just needs to be played straight. So anyway, you got me going on that one.
1:33:12
But that's that's the whole thing with the IRS. It should never have been here to begin with. It was an illegal system to begin with. And I'm glad that President Trump realized that and got rid of it for the British territorial people. And I am um very much I I told you what I expect the municipal government to do. It'll just vanish like uh you know a carnival show blowing town.
1:33:48
Okay. So Shannon. Okay. Greetings Anna and Shannon.

## Chapter 11: Addressing citizenship issues

1:33:57
What does one do with their will after it's been made? So if you die, the will can be found. I have very little little poverty resources. But what I do put in my will, I would like to be found eventually.
1:34:10
Well, bless your heart. As part of your will, you have beneficiaries, right? And as part of your will, you must name an executive, somebody who's going to be responsible for making sure that your beneficiaries get your stuff.
1:34:32
So whoever you are entrusting as the executive of your estate needs to be named in your will and that person is then responsible. So you give your executive a copy of your will and that could be anybody. Uh it could be a friend, it could be a neighbor or your pastor or anybody that you trust and then it's in their hands after you die. Um they have the responsibility of bringing forward your will and letting everybody know the distribution of of your your personal belongings. So, it's up to you.

1:35:36

Go ahead, Shannon.
1:35:39
All right. A man who is a ship captain got a job in Florida for the winter. He filled out an I9 as required. DHS came back to his employer and stated he was not a US citizen and ineligible to be employed anywhere. They to told him to go to Social Security. They tried to pull his records, but there were none there for him. What should he do? Should he go to DHS with his paperwork or what?
1:36:07
Shannon, repeat that entire thing.
1:36:17
A man who is a ship's captain gets a job. A man who was a ship's captain got a job in Florida for the winter. Where was he filled out an I9 that I'm telling you everything I have here.
1:36:32
He filed out an I9 as required which I believe the I9 is one of their forms for uh uh visa holding immigrant work if I recall correctly.
1:36:43
Mhm. DHS came back to his employer stated he was not a US citizen and ineligible to be employed anywhere. They told him go to social security. They tried to pull up his records and there were none for him. What should he do? Should he go to DHS with his paperwork?
1:37:04
Well, so far it sounds like he doesn't have any paperwork and that's the problem. Um now you know a ship's captain typically undergoes a a test and becomes a ship's captain because he's demonstrated an ability to navigate and you know stay in the right sea lanes and things of that nature. So there's there's a you know a competency involved in being a ship's captain and ship's captains are um in demand worldwide uh to actually transport people and cargo all over the place. So, it isn't that un unlikely or unusual for a foreign ship's captain like someone from Holland or or Costa Rica or, you know, to uh get a job with a corporation or a company based in Florida or Texas or whatever on a temporary basis.
1:38:22
And this seems to be what you're describing to me is that someone from a different country who is a, you know, a recognized ship's captain got a job with a company in Florida to um, you know, navigate a ship around the world for whatever reasons uh, for the winter on a temporary like three month basis and that is about as common as dirt. So there shouldn't be any problem associated with what you're trying to do so long as you have your ships.
1:38:58
I have an update. Okay?
1:39:02
He's an American and he is also papered up. Okay?
1:39:09
So, if he's an American, why doesn't he have any paperwork then in the US database? Does does anybody know?
1:39:25
That's the confusion part about the Social Security office, Al Wagger.
1:39:30
Right. I mean, if he's a if he's an American and he's working as a ship's captain, he would have a social security number normally. And so I'm I'm trying to figure this out. I mean, if he was a national of another country who came here and who um qualified to adopt a state of the union and become a a national of say Florida.
1:40:06
Okay. Um he would not have any social security number in the US system because he's not a US citizen. He bypassed becoming a US citizen and naturalized as a state national under the old system under the updated again.

1:40:30

He was born in Delaware and should have information at social security office.
1:40:37
Okay. So that's just a you know another government f up if you will. um he knows his social security number and that should be more than enough um basis of identification. He should also have a birth certificate issued by the state of Delaware.
1:41:00
Um there there should be no problem whatsoever for him to work in Florida. I I'm just absolutely stymied and stopped on that one. I would definitely get in in contact with the social security administration and uh with the um the registar um it's a guy named Bullock in the state of Delaware uh state of state department the um it's the um secretary of state office And then there's a subdivision which is the um the division of um
1:41:53
corporations within that state secretary of state office in Delaware. He
1:42:00
presented both his social security card and birth certificate to the social security office in Delaware.
1:42:08
And they didn't have his account information apparently. I'm telling you the information as I get it.
1:42:22
[clears throat]
1:42:39
No new information yet. So, uh, do we want to carry on to the next question till I Hold on. Here we go. We got more information.
1:42:47
Nothing. Nothing showed up on social on their office. So, yeah.
1:42:54
Did you check for a death certificate?
1:42:59
I'm not joking. There there's been a rash of of scams where people have um you know been declared dead.
1:43:09
Um they just said his account was blank.
1:43:17
So they admitted that an account existed but said it was blank.
1:43:29
and he did not.
1:43:30
This is This is very confusing and something we should probably dive into some other time.
1:43:35
Yeah, I'll be I'll be happy to to chase it for you. It it is it but it doesn't make sense to me. Okay.
1:43:43
Um you're you're texting me now so we know who you are. We'll get a hold of you tomorrow. Sound good? Okay.

## Chapter 12: Jural Assembly Coroner

1:43:50
All right. Let's move on to the next one. Does a state jural assembly coroner have to have a medical professional background? If yes, can you specify the minimum requirements, please?
1:44:02
Well, it should be someone who's credible as a coroner. Um, that could be a medical doctor. It could be a 0 physician's assistance. It could be a nurse practitioner. Um it could be a um uh someone who's certified in emergency services uh to um recognize when someone is dead.
1:44:32

Uh so it should be somebody who has experience with dead people and knowing you know checked down not breathing no sign of brain activity unresponsive to stimuli uh you know this has gone on for however half an hour and there and no sign of life. Okay, um it should be somebody who's credible to make that kind of an assessment and determination. And there are quite a few people out there who um have the sufficient experience because we have for example we have a a lot of Navy corman out there who they know when somebody's dead.
1:45:23
Um, and so it it's not that hard to find a competent coroner. Now be aware too that there are some odd you know one in a 100,000 cases um where someone will be under a form of shock or um other circumstance where they get pronounced dead and they're not.
1:45:55
This happens with hypothermia cases. It happens with electric shock cases. Uh it happens occasionally uh when there has been a um some sort of of trauma [clears throat] and the the person naturally resuscitates and you know this is it does happen.
1:46:25
So just be aware that uh whoever that whoever you choose as coroner uh should be the the kind of person who's very diligent and very aware and is really competent to make a determination that someone has died. That's all. It doesn't have to be a medical doctor.
1:47:00
Okay, next question. Besides writing the SOP, return to sender, etc. language on IRS and/or tax letters, other advice to keep them at bay, turn them away, deter them, stop them from leaning and levying, open the letters or return them unopened. Does it matter if we are still in the system filing or not?
1:47:20
And the word on the street is most local IRS offices will be closed by year's end. How is this kept so secret? Do you have any updates?
1:47:28
Well, number one, Trump is going has already signed the order to get rid of the Internal Revenue Service upper and lower case, which is supposed to be addressing federal employees and dependents, not us. Okay?
1:47:45
And like I said, the Roman Curia is now under a microscope and their continued operations without the British territorial operations is literally impossible. So they're going to have to fold up and go away, too. So, like I said, I wouldn't worry about the IRS. They're not going to be they're going to be busy closing up their office and shredding millions of tons of paper trying to destroy the evidence of what they've done. And I can tell you from my own experience that the master file narratives alone that they've kept on each and every single one of us to use as an excuse for enforcement activities that are absolutely illegal are like about that thick.
1:48:37
So imagine 300 million Americans with uh master files that thick that they're going to be busy shredding between now and new year. They're not going to have time to pursue any action against you. They're not going to have any credibility to pursue any action against you. And remember that when Trump cuts off the Internal Revenue Service spelled out upper lowercase, he also is cutting off the fleas on that dog because the municipal government only got its foot in the door as a service for the British.
1:49:26
So when the British territorial government guts the Internal Revenue Service, upper and lower case, the dog leaves and with the dog, the fleas leave. Okay? So stop worrying about the IRS. That's the least of your worries from now on. You can sleep solidly on April 15th and on every April 15th from now on.
1:49:54
Now, the Roman Curia is not going to like hearing that because they've been charging income taxes on their parishioners ever since the 1100s. Okay? But it's time for the Roman Curia to wake up and realize that not everyone is Catholic and not everybody owes the Pope. Sometimes the Pope owes other people and this happens to be one of those cases. So, just expect the whole thing to go. Expect Ogden, Utah to

be a ghost town by Christmas. Expect that this is going to get nixed because it's illegal. It's unlawful. It's immoral. It should never have been here.
1:50:46
I [clears throat] have a correction to make. Someone corrected me and I admit it when I'm wrong. The I9 apparently is for US citizens that you as a contractor you fill out. So you get a 1099 for the your temporary work during the se season. Okay. I was I misspoke and I stand corrected. All right. For the next question.

## Chapter 13: MOCEE Paperwork

1:51:09
So with the IRS service cut off, where do we send our MOCEE paperwork?
1:51:16
Well, the IRS was never really admitting that it was the appropriate service. The IRS just happened to know on a spotty basis what we were talking about. And it appears to have been just a matter of if you've got an IRS officer that knew or didn't know.
1:51:38
So, uh, the IRS was never actually the stipulated office. the stipulated office was the um secretary of state of the department of state. Okay. So it would be Marco Rubio in his uh office as Secretary of State of the Department of State who would have been responsible for handling the mutual offset credit exchange exemption because that was the the remedy that the British Parliament came up with.
1:52:16
And that remember we we brought forward the Naval Dispositions Act and he was named his specific office was named as the officer responsible for all of this. And so there should have been a mutual offset credit exemption exchange office established in the office of the secretary of state within the department of within the department of state. Okay?
1:52:52
And um this is just another one of those remedies that they published and then never actually made public and never made accessible and never actually established a program for people or instructions for people.
1:53:10
Um and and they have a long history of doing this kind of criminal activity where they try to they try to do something criminal and then they attempt to legalize it by providing a remedy and then they don't provide the remedy which means that it was never legalized and therefore remains illegal and criminal. Okay. So this is this is the kind of leaprogging that we've had. Um but yeah it would be Marco Rubio's office uh and it would be under the department of state not the state department or department of state of state uh but um yeah and we have corresponded and we have knocked on doors and we've brought this to the attention of numerous numerous federal judges, and federal prosecutors and attorneys and um always the same uh you know it's this look like a deer in the headlights followed by a a mumbled u well I've never seen that before and then followed by a well I'll get back to you and then they never do and of course it's because they never did the homework they never did the actual remedy. They never made it accessible.
1:54:41
And so, uh, that is part and parcel of what's so terribly wrong about the way this was administered. But okay, take a step back too and consider that since 1920, they have been trying to register every American baby as a British subject and misrepresenting them as British subjects.
1:55:10
And Americans are the only ones who are eligible to receive the mutual offset credit exchange exemption and are the only ones who actually earn the prepaid credit because all the British subjects in this country are legal persons. They're not lawful persons. They're not living people. Okay?
1:55:42
So, what they've been doing has been evading their obligations under the Constitution of the United States of America, and they've been setting up a constructive fraud scheme to defraud you of your identity and the guarantees that are owed to you under that identity. And this is a State Department problem. And believe me, I've been pursuing it.
1:56:17

I've been after him hammering tongs, you know. I I've been after him for that.
1:56:22
And I've been after him for the a similar situation with the Federal Reserve. When the Federal Reserve came in and offered to exchange paper for our silver, they had a remedy in place that they never actually made available or accessible to the public. And that was back in 1913. And you know it they were in 1913 they came in and they began this whole mess.
1:56:46
And then by the 1934 they were forced into providing a remedy which was a um you know a a published exchange rate that we could then um follow forward and and enforce. And they never actually did any of it. They never actually disclosed any of it. They never made any kind of of um recruitment possible because you could not take your Federal Reserve notes and exchange them for silver at the Fed window.
1:57:31
They started licensing it so that only people who had a special license, like a stock broker's license or a bank license, could exchange Federal Reserve notes back for silver.
1:57:46
So they did not provide the remedy, the published remedy for the illegal acts that they were trying to legalize with the remedy. I've been stomping all over them for it.
1:58:05
All right, now we got about 10 minutes left, so why don't we tie this up and give the shout out to Tony and his organization we talked about. Oh, shoot.

## Chapter 14: Humanitarian efforts

1:58:14
I don't have that in front of me, Shannon. I am so sorry. I know you went to great lengths to find it for me, too.
1:58:23
Left hand side of your desk, printed off piece of paper says Tony on top of it. Left. I shuffled through everything here. I want you to know. Okay I can give a reader's digest for you, boss.
1:58:44
Maybe. Maybe. Well, you know how it is. I work and I paper chaotic. I understand. I shuffle paper.
1:58:55
The basics of it is there is some relief becoming available soon through the olive branch organization from Ireland, aka Tony the Irishman, as I call him.
1:59:06
Anyone looking into that or wanting to be interested in it can look it up at www.theolivebranch assembly.com and then follow the instructions. Pretty simple, pretty straightforward.
1:59:23
Yeah. And I just want to add to that, this is a an organization that was founded after the death of Tony's mother. And it was a um kind of a memorial effort um to address health needs and um alternative um medical options that people have. and and to remember and and care for seniors especially. Um so it's it's a um humanitarian effort throughout.
2:00:02
uh it accumulated a few million dollars in assets over the years and um Tony decided that with all of the chaos and and misery that um they would begin doing these little um up to$10,000 but mostly under $5,000 grants just to help people get through uh when there's a a one-time emergency. And um you know it could it could be anything that was um something that was a real verifiable urgent need that you are not prepared for or able to meet any other way.
2:00:47
And so, for example, um you you might um be uh a veteran with no dental insurance and need to have a tooth pulled. Okay. What do you mean?
2:01:01

That ain't cheap. I'll vouch, right? You know, but because most employers do not provide dental insurance, you've got a bunch of people out there who can't even afford to get teeth extracted and they're in terrible pain and they have a infection in their head that is life-threatening. Okay, that's an urgent need and you might not have the uh $700 in your back pocket to be able to to pay for extracting a tooth. Okay. Um, you might be a senior um living uh out in the woods without a um a furnace or a even a you know a heating stove that is um viable for the winter or you might not have fuel for a heating stove that you have. Okay. There are a lot of situations like that that are urgent that um and so this is a an effort and it's directed to pardon me it's directed to people who were on the land and soil. So, those of you who have have done your due diligence and have uh recouped your natural lawful standing, um go ahead and apply if you have situations like that because it, you know, it's one of those opportunities that come and it's it's meant for those who really need the help.
2:03:02
It's not meant as, you know, uh supplementary income. It's not meant as um some sort of government welfare benefit because it certainly isn't. Uh it's meant as precisely what it is, a um good faith and goodwill um distribution of of um funding that uh is being provided to assist people who are destitute and desperate who have come onto the land and soil and are coming back home and need help.
2:03:47
So if you need help, go ahead and apply. If you can make it on your own, more Godspeed to you. And um please no no nastiness, no suspicion, no you know anything about it. It's just a very pure and simple um application process. They ask you for I think $10 and for $10 you get back a PDF uh version of the book. Uh “You Know Something is Wrong When” and you know “An American Affidavit of Probable Cause.” And the reason that uh he did that and that I agreed to it is that we need to get more copies of this foundational primer out there in the world so that more and more people can understand um at a very basic level what went on and how we wound up in this situation and what we're dealing with now. So this was a an effort to provide educational material to a lot of people worldwide and um so that's why there's that $10 domate donation and then the PDF of the book being distributed.
2:05:21
Um, the $10 donation goes to cover uh the administrative cost of going through the applications, which of course requires people to sit and consider it and, you know, doing all of the the paperwork involved. Um, and then the um he Tony said that there would be a donation back to me as the author or one of the authors, but um [clears throat] Jim is gone and I'm alone and I have never taken the dime from that book and I don't intend into I intend to plow it right back into Federation operations and to um continue our work here. So that's what's going on and that's all that's going on as far as that's concerned.
2:06:32
Perfect timing for us to tie it in for the night.
2:06:36
All right, I'm headed for the barn and he's headed for his supper. You can't tell, but he is.
2:06:43
Oh yeah, fresh grilled cheeses and soup.
2:06:47
Sounds good. Okay guys, God bless. I hope this was reassuring and that you all continue to be unflapable in the midst of the storm.
2:07:00
Take care. Good night. God bless.
